	Connect				
	Status: Disconnected				

## NOTE: Once the 4REA4 is updated and restarted, all connected peripheral devices (A-Control and I/O boxes) will automatically be updated as required.

## The procedure is as follows:

- Connect your controller computer with an ethernet cable to one of the 4REA4 network ports (front or rear or via an ethernet switch) Ensure that your controller computer has a compatible IP address to connect to the 4REA4 The default 4REA4 IP Address is 192.168.1.70 with Subnet Mask 255.255.255.0 and Gateway 192.168.1.254 Your controller computer could, for example, be set to 192.168.1.200 with Subnet Mask 255.255.255.0
- Install and run the 4REA4 Controller software To Install - Extract the content of the downloaded ZIP file to a folder on your Controller computer Close any existing instances of 4REA4 Controller Software Run the 4REA4 Controller Installer application and follow the on-screen instructions
- 3. When the Controller application is installed and running, click on the **System** button in the top left bar and you should see the view in the picture above.
- 4. Your 4REA4 unit should appear in the Connect To box on the left of the screen click this entry. Details of current and available firmware will be displayed along with a button to start the update.
- 5. Click the update button, follow any on-screen instructions and wait for the process to complete. The 4REA4 will automatically restart during the upgrade procedure.

If you have any questions please call us - UK Office hours are 8.30AM to 5.30PM (GMT) Monday to Friday.

Whilst we do offer an "Out Of Hours" Support service during evenings and weekends, there may be a longer delay in response during those times so please bear this in mind.
