SETUP OF MULTIPLE DISPLAY SCREENS

Quit the engine to Windows
Right click on the desktop
Select properties
See the display properties/settings window below.

Graphics card 1 controls 1-4, graphics card 2 controls 5-7 (8 remains unused).
1-3 are surfaces, 4-6 are meterbridge, 7 is O/V
O/V screen resolution can be changed if required – note application will not change display to fit.
Never change internal screen resolution (or other settings).

Graphics card 1 is a PCI card being one (of two) nearest the engine rear panel (with BNC's).

Graphics card 2 is nearest the engine front (with 3 x 50 way ribbon connectors).
